Nadia Godinot, from [Collège Français Bilingue de Londres](#), talked about book classification systems from an educational perspective -e.g., how to organise the classification of books taking into consideration the users of the school library.

The presentation was followed by an extensive Q&A sessions, allowing Librarians to [share tips and exchange ideas](#).

Nadia is a Teacher Librarian who graduated in France. She worked at the Collège Français Bilingue de Londres, a bilingual secondary school in Kentish Town, for a few years before returning to France over the summer 2019.

Thank you everyone!
